Circular steps in tower

The historic Toledo Harbor Lighthouse is unique with buff brick and the roof like the upside-down hull of a ship. The Toledo Lighthouse is 4000 square feet with three floors in the main building, a cellar, a two-story tower and a top lookout area located five miles off shore on a crib in western Lake Erie. The Toledo shipping channel is located near the lighthouse. When the restoration is complete, four people will stay at the lighthouse for a number of days to maintain the lighthouse and to greet boaters and tourists for a lighthouse tour.

There are three phases for the restoration: Phase One is structural and some windows, Phase Two is infrastructure, Phase Three is finishing. The first portion of the Phase One project began on August 18, 2020 and includes new windows and shutters, and brick repair on the first and second floors. The steel doors will also be refurbished. The cost of the project is \$638,000 that includes a \$500,000 grant and \$138,000 Toledo Society match with a loan from Genoa Bank.
